## **Autonomous**

Climentworks LLC – Washington State

September 2022 to Present

Since founding my LLC I've worked on a myriad of interesting projects for clients in the US and Mexico, the most notable being the direction of a massive signage project for 16 Mayan archaeological sites throughout the Yucatan peninsula, and the motion graphics and identity work for US-based companies like UofDigital, Optimal, Bishop Fox, Fluent, Anthrologic, Adittude, RecoverX, and more.

My clients can attest to my commitment and efficiency working remotely.

Since the advent of AI tools, I've been very active in learning image generation, coding, and more recently automation tool. I've taken advantage of this technology greatly to boost my speed and efficiency with platforms like Stable Diffusion, GPT, Claude, n8n, and countless smaller AI tools.
